

Omada Identity Cloud Accelerator Package

For Successful Identity Governance and Administration Projects

To ensure a fast and successful identity governance implementation, Omada Identity Cloud Accelerator provides a combination of SaaS technology, identity governance best practice processes, standardized implementation approach, and business enablement, with improved time-to-value.

Time to value has notoriously been the barrier for entry to IGA implementations. To meet rapidly increasing business and cybersecurity requirements in today's new normal, organizations need to act fast in order to be able to scale

while maintaining business agility, and stay in control of Total Cost of Ownership. Here, an accelerated time to value with flexible cloud security services is key.

Accelerate your IGA Project

As a reliable starting point and a good basis for your IGA project the Omada Identity Cloud Acceleration package offers a standardized implementation approach for deployment, a best-practice framework for process design, and training for efficient user adoption. In just five value steps your organization will have an IGA solution in place and a defined roadmap for future cloud readiness:

1. Establish

Define the value journey for the way ahead.

2. Join

Get insight into your actual state of identities and users access with governance overview of 'Who has access to what'.

3. Control

Perform access reviews and establish expected state to achieve compliance with business policies and regulations (e.g., ISO) and train the organization for improved cyber security awareness.

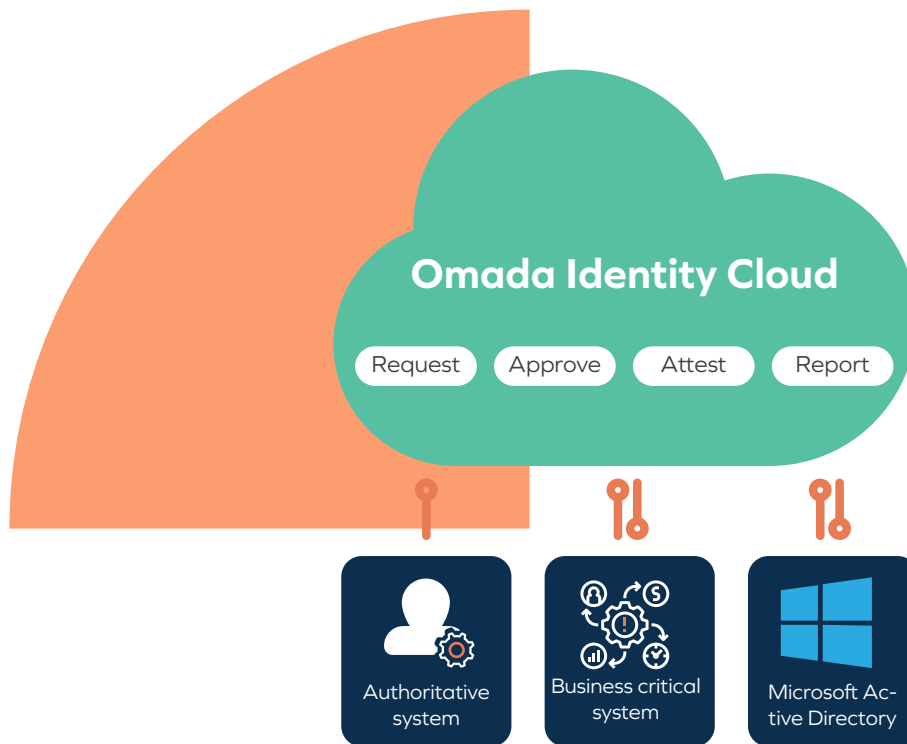

4. Expand

Enable business efficiency through self-service access request and approval workflows. Control of one critical system (e.g. ERP) with users trained and prepared for further IGA expansion.

5. Automate

Achieve end-to-end fulfillment of access to target systems and improved efficiency with birthright roles and policies. Quality improvement with role descriptions and classification.

Omada Identity Cloud

Omada Identity Cloud Accelerator

- Five contained value steps with clear exit criteria
- A full connection to HR system and AD with authentication /AAD's
- Full Omada Identity Cloud implementation including three environments (production, pre-production, integration/development)
- Complete integration of one critical business system
- Industrialized system onboarding
- Governance and self-service capabilities
- Training to embed inhouse know-how
- A strategic customer-specific road map for further implementation
- Rapid deployment in 12 weeks

Omada has a proven record of successful IGA implementations in 12 weeks. To get a fixed-price quote for the Omada Identity Cloud Accelerator Package, email us at: info@omada.net
