

Omada Academy

Supporting Seamless IGA
Adoption and Integration

Welcome to the

Omada Academy

I am proud to welcome you to the Omada Academy. Our Academy is a key part in our vision to see organizations **DO MORE WITH IDENTITY**, making sure our customers and partners get the full value of their Identity Governance and Administration (IGA) projects. We do this by helping them explore and understand the field before they choose their IGA solution so they can build the right solution in the right way, optimizing operations to maximize their return on investment (ROI).

Identity, managed the Omada way, simultaneously improves security, efficiency, and regulatory compliance throughout any organization by accelerating digital transformations, smoothing M&A integration, and enabling deeper relationships with suppliers and customers. Omada's approach is built on four key pillars – our product, our framework, our implementation, and our training.

Our innovative and configurable on-premises and cloud-based solution - Omada Identity - is based on an industry best-practice process framework we have built up over the last 20 years to effectively manage and control users' access rights to applications and data - reducing IT costs and resource-intensive administration. Omada Identity is implemented both directly by Omada and via our network of skilled partners, and our Academy ensures its high standard of delivery by using trusted industry and product experts who have provided advanced identity management solutions for some of the largest and most complex organizations in the world.

Our Academy allows you to choose a learning path or a single course. Either way our Academy will add value to your business, people and projects every step of the way. We look forward to seeing you on one of our courses.

Michael Garrett, CEO

Select your

Learning Path

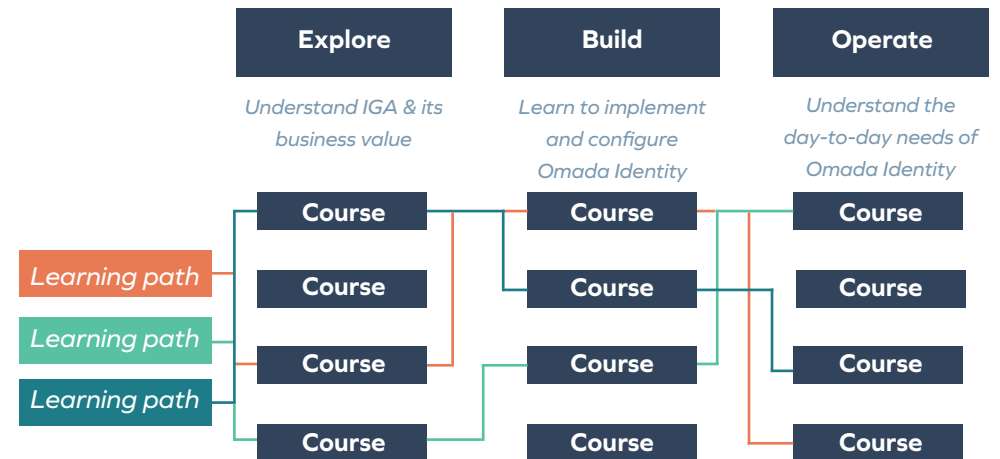

Achieve your Learning Goals

Whether you need to understand the basics of IGA, build a compelling business case for your IGA project, configure our Omada Identity platform or run the day-to-day operations of our product, our Academy is the first and best place to start.

You can choose either a single course to dive into a specific topic or area or follow a learning path that will package together several courses to give you everything you need to learn for your role. All our courses are organized into three different themes with more specific learning paths created as a combination of these.

Role based learning paths are tailored to suit the needs of the roles in an IGA team. Omada Academy's training is delivered as instructor led online trainings or self-paced digital training.

Already chosen your way? [Book your courses here](#) ►

Role Based Learning Paths

To help streamline your way to competency, we have built five different learning paths, which follow the roles people undertake within an IGA implementation.

From decision-making to operation, we have tailor-made the learning to suit your role:

IGA Sponsor

Learn the business advantages of IGA and how to build a compelling business case for an IGA solution.

Omada Identity Project Manager

Learn the skillsets needed to deliver Omada Identity projects, both standard and Accelerator Package.

Omada Identity Implementation Consultant

Learn to implement Omada Identity with the highest degree of impact and business value.

Omada Identity Solution Architect

Get the grand overview of the Omada Identity installation as the Omada Identity Solution Architect.

Omada Identity Administrator

Omada Identity Administrator Learn how to administrate Omada Identity once in production to ensure high performance and business value.

Learning Path

IGA Sponsor

Instructor led
online training

1 day

Understand the IGA and the ROI of an IGA System

WHO SHOULD JOIN?

CISOs, Security Managers, IT Directors, and other IT professionals who want an in-depth understanding of the business value an IGA solution brings a company, how to estimate the return on investment (ROI) and how an IGA solution is scoped, implemented, and maintained.

PREREQUISITES

Experience within an IT department or working with IT solutions is a benefit.

DESCRIPTION

This learning path will help you understand the field of IGA and how it sits in the overall IT Security field, which business pains an IGA solution can address, and how to calculate the ROI of an IGA system implementation. Further to this, you will learn about how Omada Identity helps solve security, compliance and business efficiency pains more specifically, and how to scope a basic IGA installation.

The path is relevant for customers and partners seeking to understand the benefits of an IGA implementation.

Learning Path

Omada Identity Project Manager

self-paced
digital training

2 days

Deliver Omada Identity Projects

WHO SHOULD JOIN?

Project Managers who are looking to deliver Omada Identity projects.

PREREQUISITES

Previous experience within managing and delivering projects.

DESCRIPTION

This learning path provides the participants with the skillset needed to deliver Omada Identity projects, both standard and Accelerator Package.

The learning path introduces the participants to the general field of IGA and explains the best approaches and practices used to manage implementing Omada projects. It will also cover the Process+ and Project+ concepts and show examples of previous implementations.

Learning Path

Implementation Consultant

Instructor led online training
+ self-paced digital training

12 days

Scope and deliver Omada Identity implementation projects

WHO SHOULD JOIN?

Implementation Consultants who are looking to scope and deliver Omada Identity projects.

PREREQUISITES

Experience with a project framework and key project deliverables such as statements of work, work breakdown structures, and stakeholder mapping is necessary.

DESCRIPTION

This learning path will enable you to scope and deliver Omada Identity projects in an organization. Over the course of the learning path, you will get a general introduction to the IGA field and Omada Identity, as well as an introduction to our essential implementation method, which aims to deliver the first part of the Omada Identity project in a compact timeframe and a quick ROI.

The body of the learning path is a 10-day long case-based Training Camp where you, together with a small team of other course participants, will go through an end-to-end simulated Omada Identity project, supervised by IGA experts within the different stages.

“

I'm really grateful that I undertook this learning path. Besides the knowledge I gained, I have met some really great people who share the same mindset as me. I know that I'm ready to implement Omada Identity.”

Karol Krystkowiak

Business Development Executive, Predica

Learning Path

Solution Architect

Instructor led online training
+ self-paced digital training

12 days

Learn Advanced Functionality & Management of Omada Identity

WHO SHOULD JOIN?

Solution Architects looking to understand and work with the architecture and functions of Omada Identity.

PREREQUISITES

Experience with the Microsoft technology stack is essential, as well as a general understanding of IGA.

DESCRIPTION

This learning path will give you a general overview to the IGA field, before focusing on the architecture, functions and advanced loading of data in Omada Identity. You will also gain knowledge about the handover to operations and the concepts, principles and practices of Omada Identity application management. The body of the learning path is a 10-day long case-based Training Camp where you, together with a small team of other course participants, will go through an end-to-end simulated Omada Identity project, supervised by IGA experts within the different stages.

This learning path is a great way for experienced Solution Architects to get practical, working knowledge of Omada Identity enabling the architect to design solutions for customers based on a detailed understanding of the Omada Identity platform.”

Rune Larsen

Director, Solution Architect, Omada

Learning Path

Administrator

Instructor led online training
+ self-paced digital training

3 days

Master Omada Identity Maintenance & Operations

WHO SHOULD JOIN?

User Administrators and Omada Identity Application Owners who want to master the daily administration or operation of Omada Identity.

PREREQUISITES

Operational experience with other applications is essential, with a general understanding of your company's application landscape an added advantage.

DESCRIPTION

This learning path provides you with the skillset needed to become your organization's super user, the Omada Identity Application Owner or Operations Manager. The learning path introduces you to the general field of IGA as well as how Omada Identity works, and how it is installed and configured. It will also cover the concepts, principles and governance practices of Omada Identity application management, and address some of the more technical aspects of day-to-day operations including monitoring, basic access troubleshooting.

With this learning path, operation technicians, user administrators, and line of business will become equipped for handling the day-to-day operations of the Omada Identity platform, business processes, and change management.”

Sune Giedo

Principal Solution Architect, Omada

Certification Program

Both customers and partners can participate in Omada's Certification program. All our certifications are designed to match specific roles in an IGA team. This enables you to best demonstrate your degree of mastery of the IGA domain and Omada Identity. You will need to renew your certification once a year based on the most recent version. The Omada Certification Program consist of the following role-based certifications:

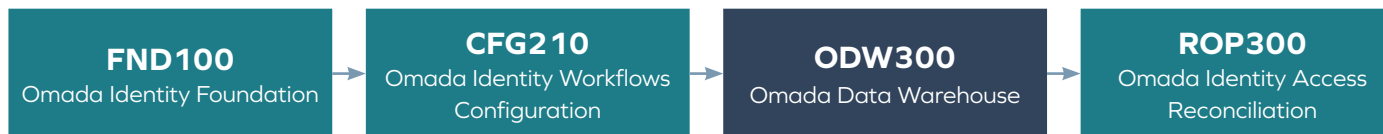

Omada Certified Project Manager

This certification verifies that you can master Omada Identity project management.

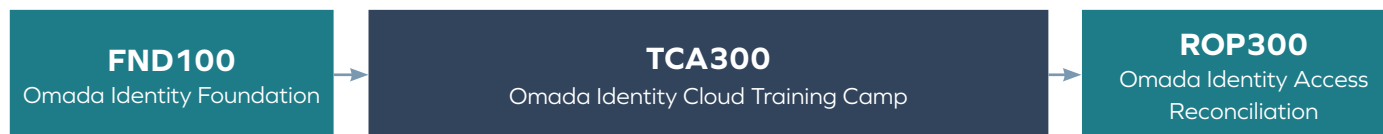

Omada Certified Implementation Consultant

This certification confirms your understanding of scoping, implementing, and delivering Omada Identity projects.

OR:

Certification Program

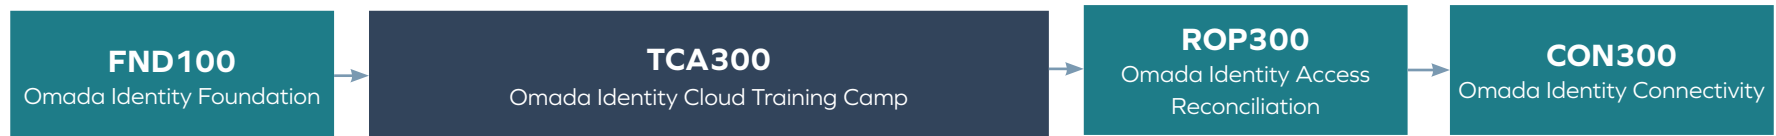

Omada Certified Solution Architect

This certification verifies that you can configure and design Omada Identity solutions, perform advanced deployments and lead complex projects.

OR:

Omada Certified Administrator

This certification verifies that you can master Omada Identity maintenance and daily operations.

Legend:

-  Available as self-paced digital course
-  Available as instructor led online training
-  Available in both modalities

How to Get Certified

Here's how to get certified:

Enroll in the Learning Path: Purchase access to Learning Path relevant to your role.
Contact Omada Academy (training@omadaidentity.com) to sign up for the relevant courses and certification assessment.

Complete the Training: You will have access to **Omada Hub**, where you can find all the training materials that are part of your Learning Path. Before you attempt the certification assessment, we recommend completing the self-paced digital courses, as well as any instructor-led online training that may be included.

Take the Assessment: After completing the training, you'll receive access to the certification assessment via Questionmark. You have three attempts available.

Earn Your Badge: Successfully pass the test and you will receive an email with a link to claim your digital badge, affirming your certified status.

Certification Details

The certification is valid for one year, and you will be notified 60 days before your certification badge expires. In order to renew your certification contact Omada Academy (training@omadaidentity.com).

As our solution matures over time, the criteria for your certifications may change. Therefore, you will need to **renew your certification once a year** to stay up-to-date with the most recent version of Omada Identity and maintain your relevant expertise in the field.

Course descriptions

Omada Identity Foundation

Self-paced digital training

6 hours

WHO SHOULD JOIN?

Everyone who wants to understand the basics of IGA and Omada Identity.

PREREQUISITES

The participants must complete the 35 minutes IGA Awareness digital training and the 30 minutes IdentityPROCESS+ digital training at Omada Hub. The participant will get access to this training when signing up for the Omada Identity Foundation course. Furthermore a basic understanding of Microsoft components such as registry and file share and SQL experience can be an advantage.

DESCRIPTION

This entry-level course is the starting point for everyone working with Omada Identity, outlining the process framework - IdentityPROCESS+ - that underpins its methodology and design.

After completion, participants will:

- Understand the Identity and Access Governance area and the terminology.
- Understand how Omada Identity is used and configured.
- Understand the underlying architecture in order to understand the data flows between Omada Identity and target systems.
- Develop understanding of the business processes enabled by Omada Identity.
- Be able to do light configuration of the processes supported by Omada Identity, based on customers' requirements.

WHO SHOULD JOIN?

CISOs, Security Managers, IT Directors, and other IT professionals interested in understanding what business value an IGA solution brings a company and how to estimate the return on investment (ROI).

PREREQUISITES

No prerequisite is needed for this course.

DESCRIPTION

Based on Omada's best practice framework, this course introduces participants to how to successfully scope and deploy an IGA solution to realize the security, compliance and efficiency benefits they need to run their business.

The course focuses on the business aspects of an IGA implementation such as the value gained and which stakeholders to include in the different parts of the implementation.

After completion, participants will:

- Understand the most common business pains that an IGA system addresses.
- Be able to demonstrate the benefits of an IGA system using Omada's use case.
- Be able to calculate the ROI of an IGA system implementation.

2 hours

WHO SHOULD JOIN?

Project Managers with a perspective of delivering an IGA project.

PREREQUISITES

- Previous PM experience
- Completion of FND100: Omada Identity Foundation training

DESCRIPTION

Participants will go through Project+ and Process+ approaches, explore the best practices of Omada project delivery and then will see them used in practice while exploring a case study.

After completion, participants will:

- Understand Project+ and Process+ approaches.
- Be able to deliver a project using Omada best practices and recommended tools.
- Be familiar with the Omada Project Manager profile

WHO SHOULD JOIN?

Project Managers having a perspective of delivering an Accelerator Package Project.

PREREQUISITES

- Previous PM experience.
- Understanding of Project+ and Process+.
- Familiarity with the AD connector guide.
- Completion of FND100: Omada Identity Foundation training.

DESCRIPTION

Participants will explore three phases of implementing an Accelerator Package: Initiation, Management and Conclusion. Each phase will contain description of tools, approaches, and best practices. The self-paced digital training will be followed up by an implementation case study.

After completion, participants will:

- Understand the concept of the Accelerator Package.
- Be able to decide when extension or scope should be added to the accelerator package.
- Be able to deliver an Accelerator project using Omada best practices and recommended tools.

digital training

2 days

This training is relevant only for Omada Identity on Premise Solutions.

This course will be provided as blended learning as a combination of self-paced digital training on Omada Hub and instructor led online training. You must complete the self-paced digital training before participating at the instructor led online training.

WHO SHOULD JOIN?

Everyone who wants advanced skills within the installation of Omada Identity components and recognizing the environmental pre-requisites for Omada product to work properly.

PREREQUISITES

Before starting this course, you should have completed the FND100: Omada Identity Foundation training. Participants should also have a good understanding of Windows Server features (IIS, Event Viewer), networking, SQL, SSIS & SSRS.

DESCRIPTION

This course gives participants advanced knowledge about installation process of Omada Identity product along with environmental requirements that needs to be met before starting the installation process. After installation, a post-install configuration is done for confirming proper work of the solution for a next phase of the project.

After completion, participants will:

- Understand the Omada requirements in the matter of server features and software.
- Understand the network relations between Omada product components.
- Be able to install Omada Identity on a newly created server(s).
- Implement post installation configuration for a Lights-On project phase.

1 hour

WHO SHOULD JOIN?

Consultants and Solution Architects who work with Omada Identity implementations.

PREREQUISITES

There is no prerequisites for this training.

DESCRIPTION

The aim of the Omada Identity Application Onboarding training is to make sure that all consultants and solution architects are familiar with the standard procedure of onboarding applications and work accordingly.

In this training participants will:

- Be able to define what an Omada Identity Application Onboarding is (contrary to a system onboarding).
- Be able to explain why we do Omada Identity Application Onboarding.
- Be able to explain the terms and concepts of the Application Onboarding.
- Be able to perform an Omada Identity Application Onboarding consisting of the 3 steps:
 - Create application.
 - Create application account.
 - Onboard application.

WHO SHOULD JOIN?

Everyone who needs to understand the basics of how to configure the process and survey modules of Omada Identity to match businesses processes.

PREREQUISITES

Before starting this course, you must have completed the Omada Identity Foundation training.

DESCRIPTION

This course gives participants an introduction to the rationale and framework for working with processes in Omada Identity and how this is configured to match a customer's business processes.

After completion, participants will:

- Be able to build and test an Omada Identity process / workflow.
- Know how to initiate, control, close, and follow-up on a survey.
- Understand, on an intermediate level, the creation of survey templates in Omada Identity.

Implementation Consultants, Solution Architects, Project Managers, and others looking to get a deep understanding and experience of an Omada Identity Cloud implementation.

PREREQUISITES

To participate in this training, participants should:

- Complete the 5 hours FND100: Omada Identity self-paced digital Foundation training.
- Complete the 30 minutes of self-paced digital training 'How to get ready for the Omada Identity Cloud Training Camp.
- Have basic knowledge of Microsoft AD, and SQL.

DESCRIPTION

The TCA300: Omada Identity Cloud Training Camp is based on a problem-solving approach where the participants will work in small project teams to deploy Omada Identity Cloud standards in a simulated real-life customer project.

The TCA300: Omada Identity Cloud Training Camp will be provided in a blended learning setup with a combination of instructor-led online training, self-paced digital training, and hands-on work in project teams.

After completion participants will:

After completion, participants will deploy Omada Identity Standards:

- Deploy Omada Identity Cloud standards.
 - Collect Identity Data.
 - Collect Access Data.
 - Configuring processes and identities.
 - Conducting provisioning.
- Map use cases to Omada functionality.
- Apply selected standard use cases from Identity PROCESS+ in an enterprise environment.

PREREQUISITES

Before starting this course, the participant must have completed the FND100: Omada Identity Foundation training.

Participants should have a good understanding of LDAP, Active Directory, SAP, REST, networking, SQL.

DESCRIPTION

This course gives participants advanced knowledge about connectivity of Omada Identity product. It takes them through basics of the data flow between the systems, and the whole process of configuring the connection with several external systems, including data import and provisioning, and choosing proper connectors and collectors.

After completion, the participant will:

- Understand the concepts and flow of data collection and data provisioning in Omada Identity.
- Be able to import data from company HR system.
- Understand how to use Omada Identity connectors.
- Be able to connect Active Directory to the solution.
- Know the basics of application onboarding.
- Be able to use Omada REST connectivity as a foundation to create a custom connector.

PREREQUISITES

- Participate in 1+ projects using RoPE and OPS.
- Completion of the following courses:
 - FND100: Omada Identity Foundation training.
 - CFG210: Omada Identity Workflows Configuration training.
 - ODW300: Omada Data Warehouse training.
- Read latest version of:
 - RoPE advanced configuration guide.
 - Provisioning Status and Tasks Explained.
 - Omada Identity release notes.

DESCRIPTION

This is an intermediate level course aiming to farther the participant's knowledge in the generation of desired state and reconciliation with actual state via RoPE and its communication with OPS. The core focus of the training will be on master data setup and troubleshooting.

After completion, the participant will:

- Understand how RoPE functions and is configured.
- Have an improved understanding of data flows between Enterprise Server and the target systems(s).
- Have improved their troubleshooting skills in regards to RoPE.

Frequently asked questions

ONCE I'VE FOUND THE TRAINING, I WANT TO TAKE, HOW DO I ENROLL IN IT?

If you want to sign up for an instructor led training, you find the registration site [here](#).

If you want to sign up for a self-paced digital training, you find the registration site [here](#).

You can also contact Omada Academy directly (training@omadaidentity.com) to sign up for the relevant courses and certifications.

WHEN DO I GET ALL THE PRACTICAL TRAINING DETAILS?

After signing up, you will receive a confirmation mail by Omada Academy with all practical details. For instructor led online training, you will receive a separate invite to Microsoft Teams.

WHAT SKILLS ARE NEEDED FOR THE TRAINING?

Each training has specific mandatory and optional training parameters. Please review each training description for requirements.

WHAT SHOULD I BRING TO THE INSTRUCTOR LED ONLINE COURSE?

Each participant should bring a laptop capable of running a Microsoft Remote Desktop (RDS) Client.

HOW MANY PARTICIPANTS CAN ATTEND AN INSTRUCTOR LED ONLINE TRAINING?

There is a limit of 14 participants. If a training is fully booked, please contact Omada Academy at training@omadaidentity.com. There is a minimum requirement of at least 4 registered participants for a course to proceed.

IF I WANT MORE INFORMATION OR HAVE UNANSWERED QUESTIONS, WHERE SHOULD I DIRECT MY QUESTIONS?

You are always welcome to contact Omada Academy at training@omadaidentity.com. We are here to support and guide you.

Since 2000, Omada has focused on using identity to create business value - measurable value, from IT and HR to marketing and sales. Identity, managed the Omada way, simultaneously improves security, efficiency, cost control and regulatory compliance throughout any organization. And, it can do even more. Identity can accelerate digital transformations, smooth M&A integration, and enable deeper relationships with suppliers and customers. Few technologies have the potential to impact so much. Belief in this essential role of identity unites our organization, fuels our innovation, and strengthens our collaboration with partners. We have pioneered many of the best practices in use today and are passionate about taking identity management even further. We are committed to using identity to create business value.
