

Training Post came into being when Can Studios' eLearning content customers wanted a simple learning management system (LMS) that wasn't complicated by confusing features they would never use.

Functionality

Connectivity between Omada and Training Post enables organizations to:

- Request accounts
- Request Assignments
- Update account information
- Reconcile Accounts
- Reconcile Access
- Review Access
- Perform Advanced Risk Scoring
- Classify Data
- Initiate Emergency Lockout

Validated objects Read:

- Users
- Courses
- Assignments
- Groups
- User Assignments
- User Courses

Validated objects Write:

- Users
- Assignments
- Groups
- User Assignments
- User Courses

The Omada Configurable Connectivity Framework offers:

- Template-driven connectivity for ease of implementation
- Flexible data model
- Adaptable and extensible data fields and attributes
- Choice of multiple authentication methods

A configurable connectivity approach provides an efficient, reliable and fast alternative that is better suited to the dynamic, hybrid IT environment where connectivity is a continuous activity. This connector for Omada and Training Post can be leveraged using Omada's configurable connectivity framework, which supports standard connectors for SCIM, REST, OData, LDAP, PowerShell, .CSV, .NET, SQL, and SOAP.
