

**Acunetix 360 is an automated, yet fully configurable, online web application security scanner that enables you to scan websites, web applications and web services, and identify security flaws. Acunetix 360 can scan all types of web applications, regardless of the platform or the language with which they are built.**

## Functionality

Connectivity between Omada and Acunetix enables organizations to:

- Request accounts
- Request Assignments
- Update account information
- Reconcile Accounts
- Reconcile Access
- Review Access
- Perform Advanced Risk Scoring
- Classify Data
- Initiate Emergency Lockout

Validated objects Read:

- Users
- Users permissions

Validated objects Write:

- Users
- User permissions

## The Omada Configurable Connectivity Framework offers:

- Template-driven connectivity for ease of implementation
- Flexible data model
- Adaptable and extensible data fields and attributes
- Choice of multiple authentication methods

A configurable connectivity approach provides an efficient, reliable and fast alternative that is better suited to the dynamic, hybrid IT environment where connectivity is a continuous activity. This connector for Omada and Acunetix can be leveraged using Omada's configurable connectivity framework, which supports standard connectors for SCIM, REST, OData, LDAP, PowerShell, .CSV, .NET, SQL, and SOAP.
