

**Snyk is a developer security platform that enables application and cloud developers to secure their whole application — finding and fixing vulnerabilities from their first lines of code to their running cloud.**

## Functionality

Connectivity between Omada and Snyk enables organizations to:

- Request Group memberships
- Request Organization memberships
- Reconcile Access
- Review Access
- Perform Advanced Risk Scoring
- Classify Data

Validated objects Read:

- Users
- Organizations
- Groups

Validated objects Write:

- Organizations
- Groups

## The Omada Configurable Connectivity Framework offers:

- Template-driven connectivity for ease of implementation
- Flexible data model
- Adaptable and extensible data fields and attributes
- Choice of multiple authentication methods

A configurable connectivity approach provides an efficient, reliable and fast alternative that is better suited to the dynamic, hybrid IT environment where connectivity is a continuous activity. This connector for Omada and Snyk can be leveraged using Omada's configurable connectivity framework, which supports standard connectors for SCIM, REST, OData, LDAP, PowerShell, .CSV, .NET, SQL, and SOAP.

---
