

Meet fuse, the AI-powered platform delivering learning, knowledge and comms into the workflow building workforce capability, keeping them updated.

Supported versions of Fuse

Fuse universal API v4.2

Omada Identity version

Minimum required version: Omada Identity v14 Update 11, CU14.

Prerequisites

N/A

Network requirements

N/A

Minimum required permissions

The user accessing the REST endpoints on FuseUniversal must have the proper read privileges.

Limitations

You need to add the Auth Token on each query in the Append field. In the connection details you can add the same auth token.

The Omada Configurable Connectivity Framework offers:

- Template-driven connectivity for ease of implementation
- Flexible data model
- Adaptable and extensible data fields and attributes
- Choice of multiple authentication methods

A configurable connectivity approach provides an efficient, reliable and fast alternative that is better suited to the dynamic, hybrid IT environment where connectivity is a continuous activity. This connector for Omada and Fuse Universal can be leveraged using Omada's configurable connectivity framework, which supports standard connectors for SCIM, REST, OData, LDAP, PowerShell, .CSV, .NET, SQL, and SOAP.

Supported objects and operations

Fuse Universal	Omada Identity Daya Model	Operations
Users	Accounts	Read
Roles	Resources	Read
User role assignment	Resource Assignments	Read

Omada, a global market leader in Identity Governance and Administration (IGA), offers a full-featured, enterprise-grade, cloud native IGA solution that enables organizations to maximize efficiency, reduce risk, and meet compliance. requirements.
