

Hoxhunt provided a one-stop solution for security awareness, behavior change, and human risk management, including a phishing reporting process.

Connectivity Package capabilities

This Connectivity Package provides support for managing Users via SCIM in Hoxhunt.

Supported versions of Hoxhunt

SCIM API V2 (they do not have versions)

Notes

- We made the import fail prove to check for the emails. value field if the username field is not filled, which is the default is you create an account via the GUI of Hoxhunt. This makes 'owning' Hoxhunt from Omada way easier.
- The unique id is the external id, so if you are not starting green field you might need to change the task mapping/data model to do a look up based on the email address instead of the externalId.
- Hoxhunt states it officially only supports Azure and Okta, but Omada is working fine as well
- You need to retrieve the bearer token from Hoxhunt admin portal, how to do so is documented in the okta or azure guide.

Prerequisites

Since Hoxhunt is a SAAS tool you need to have connectivity to the public internet.

Network requirements

Port 443 needs to be open to the public internet.

Minimum required permissions

An API key which can be generated in Hoxhunt.

The Omada Configurable Connectivity Framework offers:

- Template-driven connectivity for ease of implementation
- Flexible data model
- Adaptable and extensible data fields and attributes
- Choice of multiple authentication methods

A configurable connectivity approach provides an efficient, reliable and fast alternative that is better suited to the dynamic, hybrid IT environment where connectivity is a continuous activity. This connector for Omada and Hoxhunt can be leveraged using Omada's configurable connectivity framework, which supports standard connectors for SCIM, REST, OData, LDAP, PowerShell, .CSV, .NET, SQL, and SOAP.

Supported objects and operations

| <System objects> | Omada Identity Daya Model | Operations |
|------------------|---------------------------|------------------------------|
| Users | Accounts | Create, Read, Update, Delete |

Omada, a global market leader in Identity Governance and Administration (IGA), offers a full-featured, enterprise-grade, cloud native IGA solution that enables organizations to maximize efficiency, reduce risk, and meet compliance. requirements. Founded in 2000, Omada delivers innovative identity management to complex hybrid environments based on our leading technology, proven best practice process framework, and best-in-breed deployment approach.
