

IBM Tivoli Directory Server

IBM® Tivoli® Directory Server is the IBM implementation of the Lightweight Directory Access Protocol (LDAP) for supported Windows®, AIX®, Linux®, Solaris, and HP-UX (Itanium®) operating systems. IBM Tivoli Directory Server provides a server that stores directory information using a DB2® database, a proxy server for routing LDAP operations to other servers, a client, a graphical user interface (GUI) for managing servers, and a GUI for managing users.

Functionality

Connectivity between Omada and IBM Tivoli Directory Server enables organizations to:

- Request Access Rights
- Provision and Deprovision Access
- Reconcile Accounts
- Review Access
- Perform Advanced Risk Scoring
- Classify Data
- Initiate Emergency Lockout
- Resource Lifecycle Management

The Omada Configurable Connectivity Framework offers:

- Template-driven connectivity for ease of implementation
- Flexible data model
- Adaptable and extensible data fields and attributes
- Choice of multiple authentication methods

A configurable connectivity approach provides an efficient, reliable and fast alternative that is better suited to the dynamic, hybrid IT environment where connectivity is a continuous activity. This connector for Omada and IBM Tivoli Directory Server can be leveraged using Omada’s configurable connectivity framework, which supports standard connectors for SCIM, REST, OData, LDAP, PowerShell, .CSV, .NET, SQL, and SOAP.

LDAP Objects	Omada Identity Data Model	Operations
Users	Account	Create, Read, Update, Delete
Password Reset	Account	Set/Update
Groups	Resource	Create, Read, Update, Delete
Ou’s	Resource	Create, Read, Update, Delete
Group memberships	Resource Assignment	Create, Read, Update, Delete

Omada, a global market leader in Identity Governance and Administration (IGA), offers a full-featured, enterprise-grade, cloud native IGA solution that enables organizations to maximize efficiency, reduce risk, and meet compliance. requirements. Founded in 2000, Omada delivers innovative identity management to complex hybrid environments based on our leading technology, proven best practice process framework, and best-in-breed deployment approach.
