Omada Identity Cloud

Modern Identity Governance for the Enterprise

Modern Identity Governance for the Enterprise

The rapid adoption of cloud technologies has transformed IT, making secure and compliant access to critical data and systems more paramount than ever. IGA-as-a-Service solutions provide organizations with cost-effective, scalable, and user-friendly tools to address these challenges. Embracing an IGA program goes beyond technology; it's about transforming identity and access management practices for lasting success.
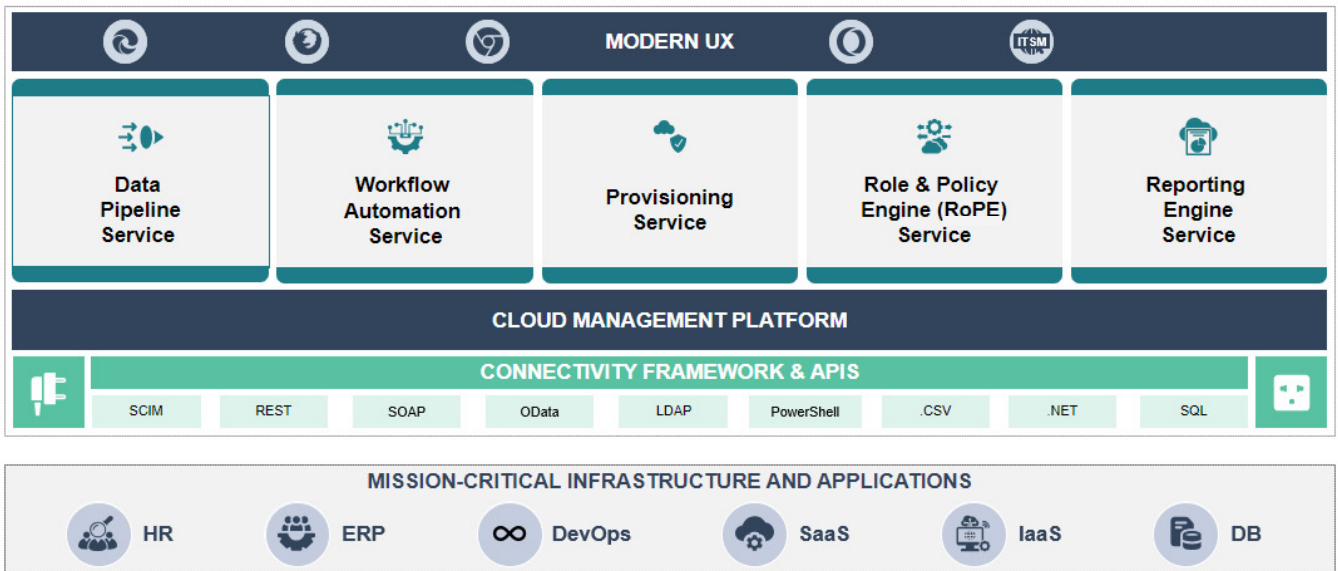

72%

Organizations with users that have unnecessary access and overly permissive accounts.

Enter Omada Identity Cloud: SaaS IGA for the Enterprise

Omada Identity Cloud is a full-featured IGA-as-a-service solution built to meet the needs of the business. With highly configurable workflows, automation capabilities, built-in best IGA practices, and no additional code required, our SaaS-deployed platform significantly increases operational efficiencies, bolsters security posture, and delivers complete visibility. We hold the distinction of being the only IGA solution that can be rapidly deployed within a 12-week timeframe, ensuring the fastest time-to-value of an IGA investment.

Robust integration capabilities are critical to having a successful IGA deployment and adoption. Omada Identity Cloud utilizes a microservice-based architecture to seamlessly connect with hundreds of business-critical applications and systems. With our configurable connectivity framework and extensive library of pre-built connectors, businesses can rapidly onboard applications, eliminating the need to create custom integrations.

Omada Identity Cloud is an integrated platform that encompasses several key essential services, including data pipeline management, workflow automation, and user provisioning. Omada connects to hundreds of applications and services, including HR, SaaS, and CRM, through our diverse API capabilities, like SCIM, OData, and GraphQL.

Features and Benefits

ILM Made Easy

Our platform streamlines identity lifecycle management (ILM), effectively handling joiner, mover, and leaver processes for all identity types. Our centralized self-service portal simplifies both the access request and approval process. By automating governance and control, we provide unified provisioning across IT systems while also bolstering the effectiveness and security of access management. Automate ILM, reduce errors and manual tasks and increase compliance with Omada Identity Cloud.

Configurable Workflows for Every Business Need

With our dynamic workflow engine, administrators can design flexible process workflows tailored to specific business requirements, supporting manual, event-driven, or scheduled workflows. Our pre-configured email integration and prompts streamline communication and task management across the organization, enhancing overall workflow efficiency. Swiftly adapt to evolving business demands and bolster collaboration with Omada's workflow engine.

Simplified Access Certification

Omada Identity Cloud simplifies the certification process with customizable surveys, enabling the verification of user entitlements, account validity, and permission assignments. These certifications can be triggered automatically or scheduled for regular re-certification. Centralized monitoring provides complete visibility into the certification process, strengthening security and making it easy to maintain continuous adherence to evolving regulations.

A Holistic Approach to Compliance and Risk

Ensure comprehensive compliance and risk mitigation with our robust suite of tools, including detailed audit trails, user-friendly dashboards, integrated risk scoring, and holistic reporting capabilities. With the Omada Compliance Workbench, administrators have complete visibility into the compliance status of every onboarded system, empowering informed decision-making and proactive risk resolution.

Configurable Connectivity Framework for Unified Provisioning

Our configurable connectivity framework seamlessly integrates existing IT infrastructure, SaaS applications, and business systems, enabling unified provisioning across all environments. This framework supports standard APIs for GraphQL, SCIM, REST, OData, LDAP, PowerShell, .NET, SQL, and SOAP. With a comprehensive connector library, including applications such as SAP, ServiceNow, and Microsoft Active Directory, organizations can effortlessly integrate all their mission-critical applications with Omada. Additionally, our GraphQL API enables custom and third-party integrations, empowering organizations to centrally manage and control access to resources across their entire IT landscape.

The Omada Difference

Omada Identity Cloud is the clear choice for IGA, offering a unique blend of powerful features and unparalleled ease of use powered by our microservices architecture. Our data-driven approach promotes informed decision-making, while our configuration-based customization eliminates the need for coding. With closed-loop compliance, we ensure proactive risk mitigation powered by our rules and policy engine. Lastly, our flexible data model enables uncomplicated object modeling and model-changing without recompiling of code or other configuration changes.

Modern microservices decoupled Azure architecture using shared scalable services with dedicated customer storage

ALL connectors provided in single service subscription

Customer **self-service SaaS** tenant that enables complete IGA instance control and management

Simple uncomplicated object model that supports extensions to the base semantic data model

Single browser configuration for process **workflow, policy and connectors**

Flexible data model changes, extensions, no re-compilation of code, work or other configuration

Since 2000, Omada has focused on using identity to create business value –
measurable value, from IT and HR to marketing and sales. Identity, managed the
Omada way, simultaneously improves security, efficiency, cost control and regulatory
compliance throughout any organization. And, it can do even more.

Identity can accelerate digital transformations, smooth M&A integration, and enable
deeper relationships with suppliers and customers. Few technologies have the potential
to impact so much. Belief in this essential role of identity unites our organization, fuels
our innovation, and strengthens our collaboration with partners. We've pioneered many
of the best practices in use today, and are passionate about taking identity
management even further. We are committed to using identity to create business
value. Omada has operations in North America and Europe, delivering solutions directly
and via a network of skilled partners and system integrators.
