🔏 Omada

SOLUTION BRIEF

Upgrade to Omada Identity Cloud

Imagine a world where the latest IGA advancements are at your fingertips, unlocking new levels of efficiency and security

In an era marked by the relentless pursuit of digital transformation, businesses are increasingly shifting their operations to the cloud to unlock unprecedented scalability, flexibility, and efficiency. As organizations embrace this paradigm shift, the migration of critical systems and services to cloud-based environments has become not just a strategic imperative, but a fundamental necessity.

Amidst this landscape, Identity Governance and Administration (IGA) stands as a cornerstone for ensuring security, compliance, and seamless access management. As a company embarking on this journey of cloud adoption across various facets of its operations, any Identity Governance solution in use must follow suit. The move from on-premises IGA to a cloud-based architecture is not merely a matter of convenience; it is a strategic move aligning with broader cloud-first initiatives, ensuring that the identity governance framework in use remains agile, scalable, and resilient in an ever-evolving digital ecosystem. Businesses need a strategic partnership to help them navigate to the cloud.

Omada is built for the cloud and ready to offload on-premises workflows

Omada Identity Cloud is uniquely positioned to take the IGA experience to the next level. Imagine a world without the burden of infrastructure management, where updates can happen automatically, and scalability happens ondemand. Omada Identity Cloud delivers exactly that, and much more, and frees IT to focus on strategic initiatives while bolstering security posture. And there is no need to spend weeks learning a new tool – Omada Identity Cloud has a nearly identical user experience to our award-winning on-premises solution - our intuitive interface ensures a smooth transition for any IT team.

Omada Identity Cloud

Omada Identity Cloud is a complete IGA solution that comes out of the box with 26 pre-configured IdentityPROCESS+ processes. This means less time spent on setup and more time on what matters: ensuring compliance and delivering value to your business.

Cloud IGA Done Right

Omada Identity Cloud is an evergreen solution, eliminating the burden of manual updates and patching. Our cloud infrastructure scales effortlessly, automatically adapting to evolving company access needs. Gone are the days of struggling with hardware upgrades and capacity planning. Manage access for all users seamlessly from a single, user-friendly portal. Grant access, review requests, and oversee everything from one central online hub.

Near Real-Time Identity Updates

Omada Identity Cloud eliminates delays with near real-time imports. Changes within your organization are reflected in minutes or hours, not days or weeks. This means that decisions on access and permissions are always based on the latest information, minimizing security risks. Near real-time updates also streamline user onboarding and offboarding processes, boosting overall efficiency.

AI and ML for Smarter Governance

Omada Identity Cloud takes IGA to the next level with the power of Machine Learning (ML) and Artificial Intelligence (AI). This advanced technology analyzes patterns in user roles, entitlements, and access rights. By automating the identification of redundancies and streamlining access controls, Omada Identity Cloud delivers a trifecta of benefits: significant time savings for IT administrators, a reduction in the overall number of roles needed, and a demonstrably stronger security posture.

Streamline Reporting, Stay Compliant

With advanced cloud-based reporting and a library of pre-built reports, Omada Identity Cloud streamlines adherence to evolving regulations like DORA and NIS2. This eliminates the burden of manual report creation, ensuring your organization stays ahead of the curve with robust governance practices. Omada Identity Cloud's robust reporting capabilities ensure that your organization has full visibility into your environment. This insight empowers administrators to proactively address compliance requirements, keeping your organization ahead of the curve.

Configuration, Not Code

Omada Identity Cloud empowers every team with intuitive drag-and-drop configuration tools for workflows and integrations. This configuration-based approach removes the need to create custom code, making IGA accessible to everyone on the team. Business users and IT professionals can work together to configure access controls and workflows with ease. With our configurable connectivity framework, IT teams can seamlessly integrate Omada Identity Cloud with any application, regardless of its location. This ensures effortless communication and streamlines access management without writing any code.

Security You Can Trust

Omada Identity Cloud leverages fortress-like security infrastructure, safeguarding customer data against cyberattacks. With robust reporting, a comprehensive audit trail, and intuitive dashboards, Omada Identity Cloud also helps streamline compliance efforts. These features allow any IT team to shift their focus from ongoing security vigilance to strategic initiatives, saving valuable time and resources.

Effortless Migration

Omada makes this migration as seamless as possible. Omada does the heavy lifting, pre-configuring your existing workflows in the cloud to minimize migration efforts. This translates to a streamlined migration process, minimizing the effort required to move to the cloud.

Addressing Cloud Cautions

Common concerns of Enterprises moving to the cloud and how Omada addresses these top concerns

Moving to the cloud undoubtedly offers a myriad of benefits, yet it also raises significant security and privacy concerns that must be meticulously addressed. One of the foremost apprehensions revolves around data ownership and control, as relinquishing physical control over sensitive information to a third-party cloud provider can lead to uncertainties regarding who ultimately holds responsibility for safeguarding the data. Furthermore, the complexities surrounding regulatory compliance loom large, with stringent data protection laws such as GDPR and HIPAA necessitating meticulous adherence, compounded by the challenges of demonstrating compliance in a cloud environment where data residency and jurisdictional boundaries may blur. Moreover, ensuring granular control over access permissions poses a formidable challenge, as the dynamic nature of cloud environments complicates traditional access management strategies, potentially exacerbating the risk of unauthorized data exposure or breaches.

As organizations navigate the transition to the cloud, it is imperative to implement robust security frameworks, data governance protocols, and compliance mechanisms to mitigate these multifaceted risks and uphold the integrity and confidentiality of sensitive information. third-party contractors, and auditable access control, allowing enterprises to confirm and certify GDPR compliance. The solution provides full-featured identity management and access governance functionalities to provide 360-degree access visibility across your hybrid IT environments for all identities.

Onramp to Cloud IGA: Omada Identity Success Migration Service

Momada o (Romado)				
	Identify & Mitigate Customizations *	Set-up cloud environment	Test and Go-live	Production
Business	Provide input to current business usage	Revised Roles and responsibilities	Business Data sanity check Continuous alignment on business processes	Continuous alignment on business
	, s	Decision on Customer-driven migration or joint approach		
	Find alternative solutions: Identify business needs and operational processes	Decision on historical data: partial or full move to cloud?		
Technical	Identify customizations (checklist)	Review and adjust <u>Migration</u> <u>Runbook</u>	Test	Potential decommission of old database
	Provide documentation (solution design etc.)	Optional: Cloud Pilot	Migration Runbook • Cut-over • Go-live • Hypercare	
	Potentially Omada Health check review or Fit/gap	Optional: move of historical data		
	Upgrade to latest on-prem version	Omada Management Portal		Continuous upgrades and alignment of environments
	Find alternative solutions: How can new product features replace old customizations? (<u>checklist</u>)	Technical Pre-requisites (VPN, firewall, DNS etc.)

* Most time-consuming phases for Customer (pending quality of documentation, data and business processes)

Umada's collaborative migration process ensures a smooth transition from Umada Identity to Umada Identity Cloud, offering a customized approach and rigorous testing for a successful upgrade. The migration to the cloud presents significant challenges for businesses, and Omada offers a comprehensive, collaborative approach to address them. Here's what to expect:

- Step-by-Step Expertise: Our team will closely collaborate with your organization to analyze current business usage, identify specific needs, and assess any existing customizations. We'll provide a detailed solution document outlining the migration plan and conduct a comprehensive Omada health check to ensure a seamless transition.
- **Tailored Approach:** Recognizing the unique nature of each organization, we'll work together to determine whether a customer-driven or a jointly managed migration approach best aligns with your team's requirements. Additionally, we'll collaborate to determine whether a partial or full historical data migration to the cloud is the optimal strategy for the current circumstances.
- Flexibility and Rigor: Our migration runbook will be continuously reviewed and refined based on customerspecific requirements, ensuring that the process seamlessly aligns with objectives. Finally, thorough testing will be conducted before going live, guaranteeing a smooth and successful launch of Omada Identity Cloud.

Ready to Move to the Cloud?

Contact us today to discuss your cloud migration journey and unlock the full potential of cloud-based IGA.

Omada, a global market leader in Identity Governance and Administration (IGA), offers a full-featured, enterprise-grade, cloud native IGA solution that enables organizations to achieve compliance, reduce risk, and maximize efficiency. Founded in 2000, Omada delivers innovative identity management to complex hybrid environments based on our proven best practice process framework and deployment approach.
